

BHATE & RAJE CONSTRUCTION CO PVT LTD

GHG Emissions Policy

Policy Statement

Bhate & Raje Construction Co.Pvt.Ltd, recognizes the urgency of climate action and is committed to achieving greenhouse gas emissions in the construction sector as per Science Based Targets Initiative SBTi guidelines for SME. This policy outlines a progressive approach to achieve significant and measurable reductions in GHG emissions throughout the construction lifecycle.

Reduce Overall Emissions

- **Mandatory Reporting:** All construction projects above a specific size threshold will be required to report their GHG emissions using a standardized methodology.
- **Green Procurement Guidelines:** Establish clear guidelines for prioritizing low-carbon materials, local sourcing, and recycled content.
- **Construction Site Efficiency Standards:** Implement energy-efficient construction practices

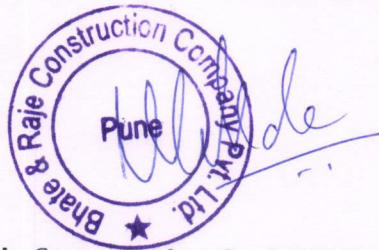

Collaboration and Knowledge Sharing

- Promote knowledge sharing and best practices through training programs.

Benefits

This policy aims to achieve significant environmental benefits while fostering economic growth in the construction sector:

- Reduced environmental footprint and contribution to climate change mitigation.
- Improved energy efficiency and resource utilization.
- Enhanced public image and brand reputation for sustainability leadership.
- Potential cost savings through reduced energy consumption and waste generation.
