

BHATE & RAJE CONSTRUCTION CO PVT LTD**WASTE MANAGEMENT POLICY**

As part of our efforts to deliver our Sustainability Vision, we at Bhate & Rajee Construction Company Pvt. Ltd have established this Policy to demonstrate our commitment to the implementation of the widely used 'waste hierarchy':

- **Preventing waste;**
- **Reusing waste;**
- **Recycling waste**
- **Disposing of waste responsibly.**

In furtherance of this commitment, we have adopted this 'Waste Management Policy'.

Background of the Issue

Nearly all facets of a modern society result in the production of waste. From individual households to large production facilities, various types of solid waste (often categorized under terms such as 'household', 'commercial', 'controlled', 'hazardous', 'biomedical', 'construction', etc.) are produced in vast quantities. Traditionally, such wastes have been disposed of through dumping into landfills or incineration, but there is now a recognition that these methods are both unsustainable, given the dwindling supply of landfill capacity and the resulting emissions of carbon dioxide and methane that contribute to climate change and the local health impacts of emitted particulates.

How it Relates to BRCCPL

All of our sites and activities produce solid waste in various forms and quantities. In pursuance of our stated commitments to prevent, reuse, recycle and, where necessary, responsibly dispose of solid waste, we have adopted a number of aims towards which we will strive.

These aims are supported by a range of actions and improvements through which those aims are to be achieved.

We aim to gain a full and detailed understanding of the nature and scale of all the solid waste produced at our sites.

BHATE & RAJE CONSTRUCTION CO PVT LTD

To do this we will:

- Identify the current means of dealing with each waste;
- Prevent or minimise the creation of solid waste in the first place through improved efficiency, the use of new technologies, changes in processes;
- Identify new opportunities to reuse or recycle wastes

We aim to continue our current efforts to minimise the amount of solid waste we produce and reuse or recycle that waste we cannot avoid.

To do this we will continue to:

- Exploit existing opportunities to prevent and minimize the creation of solid wastes on our sites;
- Exploit existing opportunities to reuse and recycle solid wastes;
- Dispose of those wastes we cannot prevent, reuse or recycle in the most responsible and efficient manner we can;
- Educate our employees about the causes and impacts of waste so they can, with our help, minimize their own impacts both at work and at home;

We aim to promote waste prevention, reuse and recycling across all our suppliers and business partners.

To do this we will:

- Define and openly share in a Code of Practice the minimum expectations we have of our suppliers and business partners in relation to waste prevention, reuse and recycling;
- Establish a detailed and transparent process through which the attitudes, risk profile and performance of each and every supplier and business partner with regards to a range of sustainability issues, including solid waste, is evaluated;
- Encourage those suppliers and business partners whose attitudes and performance most closely matches our own aims and aspirations.

We will continue to be fully committed to our statutory and voluntary obligations relating to waste.
